Expand your portfolio with new dosage forms that are convenient and filled with great flavor.

Looking for the right delivery platform for your next product launch?

With our chewable soft capsule technology, Chewgels™, you can offer consumers a completely **new sensory experience** with a technology that offers **great convenience and an even greater taste**.

Why Chewgels™?

From young to old, consumers are searching for **new ways to take their vitamins and supplements**. Some have difficulties when swallowing traditional formats, while others find it hard to stick to a therapy because of the dosage form or packaging of a product. As a result consumers are hungry for products that are **unique, innovative with specialized ingredients and technologies**.

Key Technology Highlights:

- ✓ Shell **solubility and stability assurance**.
- Within our chewgels the fill content may contain **solutions, suspensions, pastes and emulsions**.
- 📄 We count with the ability to select the **right gelatin and appropriate excipients** to hold the ingredients and the flavoring.
- **Lipid coating of the API** for special taste masking applications.

Burst EFFECT!

Once a Chewgel enters the mouth, it is chewed, and a **burst effect** of the **sweet, creamy and tasty liquid inside kicks in**. This explosion of **flavor** is accompanied by the **activation of the ingredients**. A few seconds later the soft capsule will melt while being chewed, without sticking to the teeth, leaving any residues to swallow nor **drinking any water**.

Chewgels

Add value while taking your Brand to a whole new level with Chewgels™!

Chewgels™ are suitable for **nutraceuticals, vitamins** as well as **pharmaceutical compositions** in different therapeutic lines.

Need some Inspiration? Discover our Chewgels™ idea catalogue with a variety of top-of-the-line formulations in categories like Immunity, Bone Health, Beauty, Mental Focus and Energy.
